

How to register and operate SSQ Binance Account opening API Setting For Smartphone

Here, we introduce how to register using a smartphone.
Of course, you can also register with PC.

For information on how to register using PC, please refer to the PC version of the manual.

【 Disclaimer 】

■ Please note the following points when trading crypto assets.

Cryptocurrency trading has many risks such as price fluctuation risk, leverage risk, liquidity risk, system risk, etc., and it is possible to incur losses exceeding the margin. Please understand the contents of the transaction rules, etc., and carry out the transaction at your own risk and judgment. Please note that we cannot guarantee any loss caused by using our products.

■ About This Site

For our products, we provide cryptocurrency exchanges around the world with a system that each customer sets up for their own automatic trading design. Therefore, we do not provide individual investment advice to each customer or exchange. The purpose of this site is to further improve your investment skills and utilize our automatic trading system. The Japanese version of the SIRIUS series is for Japanese living overseas. Contracts by Japanese residents with our partner cryptocurrency exchanges (unless registered in Japan) are prohibited by law.

◆ How to register SIRIUS Quant – 1

- 1) First, go to SIRIUS Quant (sirius-quant.com). If you can access it, click anywhere in the red frame part of the image.
- 2) After clicking the red frame part, a pop-up will be displayed. So click “Login”.

- 3) After clicking “Login”, the screen will switch.

Click “Register” in the red frame.

◆ How to register SIRIUS Quant -2

4) After clicking Register, the screen will switch.
Please enter the required items(①~⑤).

① Enter the email address you want to register.

② Enter the password you want to register.

* Please set at least 1 character each for uppercase letters, lowercase letters, and numbers, and set it from 8 to 20 characters.

③ Enter the password entered in ② again.
(for confirmation)

④ Click “Send cord” on the right, and an email will be sent to the email address you entered in ①. Open the email you received, check the 4-digit alphanumeric characters, and enter it.

⑤ Enter the 4-digit alphanumeric characters displayed on the right.

⑥ After entering all the input items, click “Register” to register.

※ After clicking “Register”, if there is something wrong with the input content, an error will be displayed in red letters at the bottom of the screen, so please re-enter according to the error content.

Smample: Email sent to the email address you entered.

◆ How to register SIRIUS Quant -3

The screenshot shows the SIRIUS Quant login page on a mobile device. The browser address bar displays 'sirius-quant.com'. The page features the SIRIUS Quant logo and a language selector with 'EN' and 'CN' options. The main form consists of four input fields and a button, each marked with a red circled number:

- ① Email
- ② Password
- ③ verification code (displaying 'L V I D') with a refresh button and a timer '(38s)'. Below the field, it says 'Click image to refresh the verification code (38s)'.
- ④ Login

At the bottom of the form, there are links for 'Register', 'Forget Password', and 'Guest'. The mobile OS navigation bar is visible at the very bottom.

After clicking “Register” on the previous screen, the screen will change to the Login page when registration is completed without any defects.

5) Please enter the required items and login.

- ① Registered email address
- ② Registered password
- ③ 4-digit alphanumeric characters displayed on the right
- ④ After entering all the input items, click “Login” to log in.

◆ How to register SIRIUS Quant -4

After clicking “Login” on the previous screen, if you can log in without any problems, the screen will change.

The registered email address is displayed in “Home”.

In addition, you can select the exchange to perform automatic trading from the pull-down on the upper left.

This is the end of the registration process for SIRIUS Quant, and we are taking a break for a while.

Next, let's open a Binance account.

◆How to open Binance Account -1

Binance has an app for smartphones. First, let's install this app on your smartphone.

- 1) When you open the app, the registration screen will open.
 - email address
 - Smartphone (phone number)Register with either.

- 2) Register the password.

* Password must be at least 8 characters.
It is necessary to use at least one uppercase letter.

- 3) Check the terms of use and click the "→" button.

◆How to login to Binance

From "Login" at the top left of the screen, log in with your registered email address (or phone number) and password. After entering the password, click "→" to display the authentication screen.

Please enter a 6-digit code that is sent to the registered email address (or phone number).

The top page opens.

Next, set the security settings.

* After Google authentication setting that is described in the following pages, it will be the input screen of the Google authentication code.

◆ Binance Security Settings

After opening a Binance account, make one of the following security settings.

- Smartphone
- Google authentication

1) Click the account mark on the upper left side of the screen and select "Security" from the pull-down menu that appears.

* If the "Security Verification" is displayed in the pop-up, you can set it in the same way from there.

2) First, let's set up Google authentication.

Select "Google Authenticator".

◆ Google Authenticator Settings -1

- 3) The "Google Authenticator" screen opens. Please turn on the check displayed on the screen.
- 4) The download screen will appear, so please install the "Google Authenticator" app. (If you have already installed it, proceed to the next step.)
- 5) After installation, click "→".
- 6) Click "→" on the "Setup Code" screen.

◆ Google Authenticator Settings -2

- 5) Click "Copy" button to copy the 16-digit code displayed on the "Backup Key" screen.
** Please be sure to save this code in a memo pad etc. for restoration when your smartphone is lost.*
- 6) Click "→" and paste the copied 16-digit key.
- 7) Open "Google Authenticator", click the "+" button on the screen, and select "Enter a setup key". "Enter account details" is displayed.
 - ① Account name : Set a name that makes it easy to understand what authentication is associated with.
Example) "Binance", etc.
 - ② Your key : Enter the 16-digit code displayed on the backup key screen.
 - ③ Type of key : Select "Time base".

◆Google Authenticator Settings -3

8) Binance is registered on Google Authenticator by entering the 16-digit code.

- ① Google authentication code
- ② The displayed numbers will change in 1 minute.

③ Since the Google verification code can be used in various situations, the types will increase as you use it.

The name is displayed so that you don't lose track of what the code is.

This time,

- Binance
- Binance registered email address (mobile number)

will be displayed.

You can register as many types as you like.

◆Google Authenticator Settings -4

Email Auth

Verification

Code will be sent to [redacted]

Email verification code **Send Code**

Enter Google verification code.

Google verification code **Paste**

Submit

Security verification unavailable?

- 9) Return to the Binance app screen and click "→".
- 10) Click "Send Code" and enter the 6-digit code you received at your registered email address.
- 11) Check Google Authenticator and enter the displayed 6-digit code.
- 12) After entering all the information, click "Submit" to complete the Google authentication registration.

◆SMS Authentication

- 1) Select "SMS Authentication" on the Security screen or "Phone Verification" on the "Security Verification" pop-up screen.
- 2) Enter your mobile phone number. Enter the number after "+81", excluding the first "0". Example) 090-1111-2233 → Enter with "9011112233"
- 3) After entering, click "Confirm".
- 4) Click "Send Code" and enter the 6-digit code you received at your registered phone number.
- 5) Check Google Authenticator and enter the displayed 6-digit code.
- 6) After entering all the information, click "Submit" to complete the Google authentication registration.

◆ Personal Verification

In Binance, there are three types of Personal Verification, and conditions such as the maximum deposit and withdrawal amount differ depending on the type of Verification.

Since API settings are required to use SSQ, please authenticate at least "Intermediate" that enables API usage.

◆ API Settings -1 (advance preparation)

- 1) Before creating the API, change the default "Binance Lite" to "Binance Pro".
* Functions are limited in "Binance Light".
→ By default, it is "ON", so slide it to the left to turn it "OFF".
- 2) Next, access the futures trading screen once.
Click on the futures mark at the bottom of the screen.
- 3) The futures trading screen will be displayed, and if you click "Start Now", the quiz screen will appear, but you can close the quiz without answering it.

◆API Settings -2

4) When the futures trading screen opens, you will return to the top page again.

5) Click "More" on the TOP page manu. Click "API Management" at the bottom of the "Services" screen to open the API management screen.

6) Create a label with a name that can be identified as the API used for SSQ. * Example) "SSQ" etc.

7) After entering, click "Create API".

◆API Settings – 3

8) The "Verification" screen is displayed.

① Email verification code

Click "Send Code" and enter the 6-digit code you received at your registered e-mail.

② Google verification code

Check Google Authenticator and enter the displayed 6-digit code.

9) After entering all the information, click "Submit" to complete API setup.

◆ API Settings – 4

8) The API for SSQ has been added to “API List”.

Please save the displayed API Key and Secret Key in Notepad, etc.

* Please note that the Secret Key will only be displayed once for your safety.

9) Click “Edit restrictions” button and check "Enable Futures" in the API restrictions field. Click the Save button to save your change.

* If the futures trading screen has never been opened, "Enable Futures" will not be displayed. Please go back and open "Derivatives > USD-M Futures Screen" and then set again.

◆How to register API key on SIRIUS Quant– 1

Register the created key in SIRIUS Quant and set it so that it can be linked with Bybit.

Log in to SIRIUS Quant (sirius-quant.com).

1) Click "Settings" in the red frame.

◆ How to register API key on SIRIUS Quant – 2

The screenshot shows the 'Settings' page of the SIRIUS Quant mobile app. At the top, the browser address bar displays 'sirius-quant.com'. Below the 'Settings' header, a light blue box contains the instruction: 'Please enter the ApiKey and secretKey.' The form consists of three input fields: 'ApiKey' (with a red circled '1' next to the label), 'SecretKey' (with a red circled '2' next to the label), and 'ApiUrl' (with a red circled '3' next to the label and the value 'fapi.binance.com' entered). Below these fields is a blue 'Save' button with a red circled '4' next to it. The bottom navigation bar includes icons for 'Strategies', 'Registered', 'Trading', 'Settings', and 'Home'.

After clicking "Trade settings", a pop-up will appear.

2) Please prepare the "API key" and "secret key" created on the Binance app.

① ApiKey: Enter ApiKey API key.

② SecretKey: Enter the secret key.

③ Select ApiUrl: fapi.binance.com

④ After filling in all, press "Save" button.

**SSQ cannot be used
with an account
opened using an
Referral ID. be careful.**

◆ How to register API key on SIRIUS Quant –3

When "**Change success.**" is displayed, the API settings are complete.

The number after "Account balance:" indicates the amount of funds in your Binance derivative account.

Next, we will explain how to operate the strategy with SIRIUS Quant.

◆ How to setting the strategy with SIRIUS Quant –1

⚠ To activate your strategy, you will need to transfer your BTC to your Binance account.

1) Click on strategies in the red frame to display a list of strategies.
Click on the strategy you are interested in.

2) You can check detailed information by clicking the strategy on the strategy list screen.
There is also information at the bottom of the screen, so scroll up to check.

◆How to setting the strategy with SIRIUS Quant –2

3) After deciding the strategy you want to operate, tap the strategy from the strategy list screen and click ① “Register”.

4) After clicking, a pop-up will be displayed. Click ② “OK” to register the strategy.

◆How to setting the strategy with SIRIUS Quant –3

When you register the strategy you want to start, it will be displayed in “Registered” in the red frame.

Before starting the strategy, we will set the lot and leverage.

The lot is set in SIRIUS Quant and the leverage is set in Binance.

There are two types of leverage, [Cross] and [Isolated], and [Cross] is recommended. [Cross] is the default setting, so if you use [Cross], you only need to set the lot. If you want to use [Isolated], please set from the Binance site.

[Pages 28](#) explain the differences between [Cross] and [Isolated] and how to set them.

◆ About Lot, Leverage and Margin

Before making settings on each screen, we will explain the relationship between lot, leverage and margin.

USDT Account

- Margin : USDT
- Lot : Specify in BTC (ETH、XRP、...)

If the lot is 0.01, it means a transaction equivalent to 0.01 BTC. Therefore, if the leverage is 5 times, USDT equivalent to 0.002 BTC will be treated as margin. In other words, 0.002 BTC can be used for BTC transactions equivalent to 0.01 BTC. (In this case, of course, you need to deposit USDT equivalent to 0.002 BTC or more.)

* Binance inverse accounts (COIN-M futures) are not available on SSQ.

◆ The difference between Cross and Isolation

BTCUSDT Perpetual Margin Mode ✕

Cross Isolated

· Switching the margin mode will only apply it to the selected contract.

Cross Margin Mode: All cross positions under the same margin asset share the same asset cross margin balance. In the event of liquidation, your assets full margin balance along with any remaining open positions under the asset may be forfeited.

Isolated Margin Mode: Manage your risk on individual positions by restricting the amount of margin allocated to each. If the margin ratio of a position reached 100%, the position will be liquidated. Margin can be added or removed to positions using this mode.

Confirm

Cross (Recommended):

All of your account balance will be automatically replenished as margin for your position to avoid clearing. “Cross” is the default setting. If the position is set without leverage, “Cross” will be used automatically. Therefore, the possibility of clearing is less than when using “Isolated”.

If cleared, the trader will lose all of his balance.

Cross is the default setting. You do not need to specify a leverage multiple for “Cross”. If you want to change from “Isolated” to “Cross”, select “Cross” and press the approve button.

Isolated

For “Isolated”, a specified amount of margin, for example the initial margin, is applied to the position and the margin can be adjusted manually. In the event of a stop-loss (compulsory settlement), you may lose the initial margin and the margin replenished to the position.

If you want to change from “Cross” to “Isolated”, select “Isolated” and press the approve button.

BTCUSDT Perpetual Margin Mode ✕

Cross Isolated

· Switching the margin mode will only apply it to the selected contract.

Cross Margin Mode: All cross positions under the same margin asset share the same asset cross margin balance. In the event of liquidation, your assets full margin balance along with any remaining open positions under the asset may be forfeited.

Isolated Margin Mode: Manage your risk on individual positions by restricting the amount of margin allocated to each. If the margin ratio of a position reached 100%, the position will be liquidated. Margin can be added or removed to positions using this mode.

Confirm

◆ Lot Settings with SIRIUS Quant

Let's set the lot with SIRIUS Quant. Lot settings are made on the registered strategy chart screen displayed on the "Registered" screen.

- 1) See the previous page for how to register on the Registered screen.
- 2) Click the ① setting button in the red frame.
- 3) A pop-up will be displayed. Enter ② the number of lots you want to set and ③ click "OK" button.

✖ The minimum trade amount for Binance is equivalent to \$ 5. Please note that you cannot set a value lower than that.

◆ Leverage Setting with Binance

After logging in to the Binance app, let's set the leverage.

- 1) First, tap ① "Futures" menu in the red frame to open the futures page.
- 2) Select ② "USDⓈ -M" and select the currency pair you want to trade.
* When using the BTC / USD strategy with Sirius, select "BTCUSD".
- 3) Next, tap the red frame part ③ under the currency name to open "Adjust Leverage" page.
- 4) Set the leverage and press "Confirm" button.

◆ Make the strategy in action

⚠ Please read the notes on the next page before putting your strategy into action!

After setting the lot number and leverage from each screen, open the “Registered” screen again.

Click "Start" for the strategy you want to start, and a pop-up screen will appear.

Click “OK” to start the strategy.

If you see green “Running”, your strategy is running.

If you want to stop the strategy, click Stop.

【Precautions when running strategy :】

Let's check before running the strategy!

Meaning of "○" "×" "Arrow" displayed on the strategy chart

○: Entry

×: Settlement

↑: Buy (buy / long)

↓: Sell (sell / short)

Tap the strategy to display the chart screen. The number of positions currently held by the strategy is displayed in "Positions" at the bottom of the screen. When there is no display, it means that you do not have a position.

If the number of positions is displayed, the strategy already has a position, and if you activate the strategy at that time, the operation will start when the next new position occurs.

◆ How to manually order the same position as the chart

Select the same currency pair as the strategy

Select the same position as the strategy

Enter the same lots as set in SSQ

Select "Market"

【% Bar】
 ► You can quickly set the number of trading volume for an order based on the percentage of your margin available.
 *Manual input is recommended when setting the same position as the chart.

Press after setting.

If you want to order manually, you need to order on Binance app.

Open the Binance app and click "Futures" menu.

Binance offers trading methods such as "Limit Order", "Market Order", and "Stop Limit Order", but if you want to manually order the same position as SSQ, "Market Order" is recommended.

(Because there is a risk that the limit order / conditional order will not be executed, and as a result, the position will be different from SSQ)

【Buy (sell) order profit loss cut】
 ► You can set the price you want to take profit and the price you want to cut off.
 *It is not recommended to set it when the position is the same as the chart. Because the position may shift

◆ How to manually settlement (Set with Binance)

You can check your current position on the tab "Position" at the bottom of "Futures" page.

If you want to settle your position manually, from the position you want to settle, open the "② Close Position" screen and select either Limit / Market (Market) to settle (③).

◆ Stop the strategy

Click “Stop” and a pop-up screen will appear.
Press “OK”.

If you see Stopped next to the start button, your strategy is stopped.

The position remains in Binance as it is just a stop of strategy.
Please settle the remaining positions manually from the Binance account.
